Baldwin Safety & Compliance Hits Milestone of 4 Million Reports Filed

Hilton Head Island, SC – November 15, 2022 -- Baldwin Safety & Compliance announced its users have surpassed four million form submissions to its proprietary Safety Management System (SMS) software.

The reports represent more than just Flight Risk Assessments and Maintenance Risk Assessments but many other forms that lead to a well-rounded safety management system, including Safety Reports, Internal Audit forms, Change Management, Accident/Incident Reports, UAS Forms, OSHA Audits, ASAP, and more. In all, the forms account for over 220 million individual data points.

“Reaching this four million milestone signifies that our clients recognize the importance of proactive safety management by incorporating strategies and activities that contribute to regular and active filing of reports every single day,” said Donald Baldwin, Founder and President of Baldwin Safety & Compliance. “With each filed report, our mission to manage risk and prevent accidents is advanced. We are always looking for ways to further streamline the reporting process, such as the recent incorporation of NASA ASRS with our reporting tool.”

Baldwin has been involved in safety management since 2004, and the data collected reaching the four million submission record was tallied from an upgraded software system installed in 2012. Known for scalable and customizable online solutions to assist and grow with an organization, the Baldwin SMS framework supports proactive risk management and the creation of positive safety culture.

Dr. Jason Starke, Director of Safety, Baldwin Safety & Compliance said, “The four million reports filed are the result of our unwavering commitment to keep our SMS software and support relevant with regular process, regulatory, and technology upgrades. We aim to support our clients with safety management innovations, customer service, and simplicity; it’s what motivates our team every day.”

Through a secure cloud-based system, the Baldwin’s SMS is a safety and quality management solution with safety-focused tools for managers and frontline workers. The system can be tailored to an organization’s size, complexity, and safety priorities. It complies with FAA regulations and meets IS-BAO and ICAO standards.

For more information about Baldwin’s SMS and how it can be integrated into an organization’s operations, contact baldwin@baldwinaviation.com or call 843-342-5434.

About Baldwin Safety & Compliance

Since 2004, Baldwin Safety & Compliance, an award-winning visionary in safety, has supported global transportation, manufacturing, and other industry organizations by crafting scalable and intuitive safety systems and related business support and training products designed specifically for their operations to encourage engaged safety cultures.
